

CSF Project - Bug corrections

Android - Frontend

- Login & Sign Up ⇒ Add Login with Google **(Not on Android no need)**
- Add a KEY to the API when opened for security

Laravel - Backend

- Smilleys size must be unchanged from upload file (so we can decide the exact size)
- Comments must be conditional to previous questions with 2 conditions: Superior AND Inferior. And off course Comments must be stored in DB
 - Comments DB Structures: POSITIVE/NEGATIVE, Comment, Branch, User
- In Dashboard add subtab for showing all Comments. -- Add 1 tab "Comments" --> All comments made in Android App should appear in this tab with 2 filters: BRANCH and DATES, Agent, Positive Negative
- Dashboard Roles --> Agent / Branch Manager
- All languages must be added. (See below)
- Social Media Pages - Images for Social Media must be a sub menu in Company Information
 - Add Images of the Social Media - Link - and Title shown below
- Numbered / Ladder= Must be configurable from Admin (Colors, background, size etc)
- When logging in as an Agent or Branch Manager, we do not see the information on completed polls. All resultats are at 0. (Bug)
- Secure Login Page
 - Add Google login to make sure it is secured - Register with Google or Normal eMAil
- In Company - eMail Notification when user sign up

Languages

- The Language name should show the one we set in the DB - Not official Languages Country
- Questions Should be entered in all Languages by user NOT Translated
